Fun Bird Facts

**Have you noticed more bird activity in your yard lately?
Here are some fun facts about birds as they migrate
back to the mountains.**

Robins don't use a nesting box like bluebirds do. However, they do like platforms, and you can buy special nesting platforms for them.

Hummingbirds are the only birds that can fly backward. A hummingbird's egg is about the size of a jellybean!

If it seems like chickadees are always coming to your feeder. It might be because they're taking the seeds off to hide them. They will hide (cache) seeds for later.

Male wrens usually start building the nest. Then the female comes by to inspect it. If she likes it, they stay. If she doesn't, they move on to a different area to see if it suits her better.
